

# Dedicated Servers

## Layered Tech's 5 Levels of Superiority

- > VALUE
- > VISION
- > EXPERTISE
- > RELIABILITY
- > CHOICE

Layered Tech offers a full range of dedicated server solutions built around high-performance Dell and HP servers housed in seven top-tier data centers around the world. Our solutions range from pre-configured servers you can have up and running immediately to more customizable configurations for your enterprise's specific situation. Whether you run Windows or Linux-based applications, we meet your needs with the broadest choice of operating systems, control panels and databases.

*Our dedicated server solutions give you the secure, scalable Web hosting infrastructure your enterprise needs with an optimum combination of affordability, flexibility and reliability.*

## Rapid Deployment Servers

Need a server in 30 minutes? Start clicking. With our preconfigured server options, you can have a server deployed in 30 minutes or less.\*

Our Rapid Deployment server options feature fully automated:

- > Configuration
- > Pricing
- > Customer Notification
- > Billing (for existing customers who set this option)

Rapid Deployment servers include:

- > Root Level Access
- > Pentagon Customer Portal
- > 24/7/365 Online Technical Support
- > Bandwidth Graphs

*These packages are deployed as is, but can be upgraded after deployment. A 90-day term may apply.*

*\*Within 30 minutes of payment confirmation. Note, cPanel installations can add additional time, depending on drive and CPU speeds.*

## Tiered Managed Services for Superior Support

We can calibrate managed services for your dedicated server solution through five service bundles. How "hands on" do you need us to be?

**DEFCON 1:** Highest level of security, full scope management, and full monitoring. *(Fully Managed)*

**DEFCON 2:** High level of security, management and server monitoring. *(Managed)*

**DEFCON 3:** Medium level of management and server monitoring. *(Managed)*

**DEFCON 4:** Normal, increased management and strengthened security measures. *(Self-Managed)*

**DEFCON 5:** Little or no involvement from our support team. *(Unmanaged)*

## Building the Server Solution That's Right For You

We can configure a dedicated server solution with the processing power you demand and the operating system, control panel and database software you prefer, to make managing your dedicated server as easy as possible.

## Operating Systems

### Windows

Layered Tech offers the full range of Windows Server editions for a server platform that integrates with existing Microsoft technology including Web services, networks, and Microsoft .NET-connected applications.

### Linux

Layered Tech also offers Linux and Unix operating systems for your dedicated servers. We support many major variations of Linux, including CentOS, Red Hat Enterprise and Ubuntu 8.x.

## Control Panels

For enhanced visibility and control of your Layered Tech dedicated server, we offer Web hosting control panel solutions from cPanel and Parallels Plesk.

## Databases

Layered Tech delivers affordable, scalable database software options with the reporting, analytic and data management capabilities you need. For Windows, we offer several Microsoft® SQL Server® 2008 editions.

## Security & Firewalls

From virtual firewalls by Fortinet to hardware-based firewalls utilizing Cisco technology to innovative blocking software and protection plans, we offer not just top-flight security, but flexibility and affordability, too.

## Load Balancing/Failover

Layered Tech's load balancing services deliver high performance and availability for your internal and external IP client access.

## Ready for the next level?

With our dedicated server solutions and our 5 levels of superiority, Layered Tech can create the server configuration to meet your business needs. Find out how at [www.layeredtech.com](http://www.layeredtech.com) today.
